

Description

Model MS59 is a medium velocity water spray nozzle which delivers a full cone spray of water from the nozzle in an angle of 90° or 120°. The nozzle functions with a water pressure of 2-4 bar making it possible to utilize the nozzles in very harsh wind conditions.

Model MS59 Nozzles have a K-factor of 59 (liter/minute/√bar).

Model MS59 Medium Velocity Spray Nozzles are available with 1/2" BSP & NPT male connections.

Model MS59 Medium Velocity Spray Nozzles are available with and without nozzle strainers. Nozzles should only be utilized in pipe systems with clean internal pipe surfaces and cavities. Nozzles should be installed in systems with a main-line water strainer with mesh size less than 3mm.

Applications

The Model MS59 nozzle is designed for fire protection and cooling of primarily tanks, building and structures against hydrocarbon fires.

Approvals
