

Description

The **FIRE KILL™** Model C Basic Valve Service Kit is a bundled series of gasket and O-ring created to ease the installation and servicing of Model C Control Valves.

The Model C Basic Valve Service Kit features the necessary gaskets and O-rings which shall be used for the Basic Valve Service of the Model C taking place every two years.

The following datasheet covers the Model C Basic Valve Service Kit.

Covered valves

The Service Kits each cover a specific service check for the standard Model C-EL and Model C-EL-PA Control Valve variations. Kits for non-standard Model C Control Valves can be supplied as well.

Each Model C Service Kit features the all necessary materials to conduct a Basic Valve Service as described in the Model C Design, Installation, Operation and Maintenance Manual

Expected frequency of use

In accordance with the Model C Control Valve Design, Installation, Operation and Maintenance Manual, the Model C Control Valves shall be serviced at different intervals as described below:

Every 12 months (1 year):

The solenoid valves datasheet and related materials shall be checked for any relevant and necessary service checks.

Every 24 months (2 years):

The Model C Control Valve shall be subjected to a Basic Valve Service requiring the use of a Basic Valve Service Kit.

Every 48 months (4 years):

The Model C Control Valve shall be subjected to a Full Valve Service requiring the use of a Full Valve Service kit.

Additionally, a Full Service Kit shall be used when servicing a Model C Control Valve after unplanned system activations. It is therefore recommended to have a Model C Control Valve Service Kit available on site always.

DN80 Basic valve service kit

DN50 Basic valve service kit

Overall description	
Application	Model C-EL Model C-EL-PA
Covered Valve Variants	Model C-EL 50-50, Model C-EL 80-80, Model C-EL 2"-2", Model C-EL 3"-3", Model C-EL-PA 50-50, Model C-EL-PA 80-80, Model C-EL-PA 2"-2", Model C-EL-PA 3"-3", Additional variations can be made for other Model C Control Valve variants
